

Campus Master Plan Update 12 February 2023

After the Townhall meeting on November 15, 2022, the overwhelming feedback we received was that, although it would be the ideal project, the proposed master plan didn't fit within a realistic cost or timeline for Holy Spirit. A follow-up meeting with the Campus Master Planning Committee reinforced that sentiment.

It also became clear from our community's feedback that the highest priority projects include a safe playground for school kids, improved campus security in the form of physically closing off the campus, and an expanded preschool.

As a reminder, the master plan was created from the community's participation in the programming process and took into consideration current and future activities as well as priorities. Based on the feedback we received, the general sentiment was that the architect captured the ultimate plan from the data collected; however, it would come with too high a price tag, so compromises need to be considered.

Currently, we are working with the architects to develop a plan that considers the necessary compromises but still incorporates the data collected from the programming activities. We will also work to get accurate estimates of the costs of all aspects of each project.

Please stay tuned for updates as we continue to develop a plan that represents our community's wishes and dreams, which can be realized via a phased approach in a time frame that everyone can get excited about and embrace.

We want to continue to hear from our community to build this roadmap for the future of our parish. Feel free to send comments, suggestions, and thoughts to us: frken@holyspiritfremont.org or jeff@holyspiritfremont.org.
